

School Board Training

Support your school board or governing body in understanding the Cognia accreditation process, standards, and protocols

The school board is a critical link to schools and systems in serving their communities. Board members are eager and hopeful, yet sometimes they lack the appropriate background to do their jobs effectively. With training from Cognia™, governing bodies can deepen their understanding of our accreditation and continuous improvement processes to support and sustain your ongoing school or system improvement efforts.

Our training

The Role of the School Board in Cognia's Continuous Improvement Process for Accreditation

In this 2 to 3-hour interactive session, school board members will learn about all aspects of the Engagement Review and the Cognia Performance Standards and Protocols that define a high-quality education institution. The superintendent—along with other district staff, if desired—will also participate in the learning for a common understanding of their unique roles and functions in the accreditation process.

“This training is essential for every school board member and superintendent, who should be very familiar with Cognia’s indicators. These indicators define excellence in establishing a healthy culture for learning, the responsibilities of leaders to influence and impact all aspects of schools in positive ways, and engagement for and growth in learning.”

—Dr. Terry Oatts, Superintendent,
Rockdale County Schools, GA

Cognia has trained more than 400 board members in recent years and will proudly support your system. To learn more, [contact your local expert](#).
