

Ensure equity in your assessments

Today's cultural and health-related events are having a significant impact on education. It's more important than ever to verify that tests provide informative results that improve outcomes for all. How do you know your tests are free of bias and sensitivity? What actionable data do your tests provide to identify gaps in learning?

Partner with Cognia to maximize effectiveness

Cognia™ has more than 30 years of experience creating high- and low-stakes assessments. Our Assessment Review Service experts examine your current tests and provide detailed feedback. The process results in meaningful team learning and high-quality assessments that align to your system's standards, pacing, and statewide programs.

Initiate an expert review of math, ELA, social studies, and science assessments to:

- Receive feedback on overall test design and structure
- Ensure stimuli are authentic, content rich, and accessible to all students
- Verify that test items are accurate, free of bias, and avoid sensitivity
- Confirm alignment to standards and appropriate level of rigor
- Review scoring materials to ensure results provide formative feedback

Assessment Review Service delivers:

- Criteria-based summary report with suggestions for improving test items and overall assessments
- Detailed annotation of your test forms
- Live webinar presentation to your team of findings, by assessment and content experts
- Analysis report that displays metadata on all reviewed test items
