

Learning Libraries

Blended Learning

With rigorous blended learning approaches, teachers spend more time with individuals and small groups of students, developing stronger 21st-century learning skills, promoting social-emotional learning, and increasing student engagement and agency. The Blended Learning Library includes 24 unique Learning Labs designed to support the implementation of cornerstone strategies and an additional 28 Learning Labs on Foundational Practices and Technology Tools.

Accelerating Student Learning

The pandemic offers educators an opportunity to reimagine education to enable all learners to meet their full potential. This unique library builds on the skills that both students and teachers developed as schools went fully remote overnight. It lays the groundwork for reinventing schooling based on equitable practices, trauma-informed instruction, accelerated student learning, upgraded assessment practices, and the development of teacher leaders. Enjoy 17 Learning Labs focused on these strategies, along with 28 Learning Labs on Foundational topics and technology tools.

Personalizing Instruction for All Learners

Digital tools and resources in the classroom allow teachers to create unique, personalized learning experiences that meet the needs of every student. Teachers will learn to personalize instruction with highly differentiated lessons that offer students choice of path and pace. Every student benefits—particularly special education and English language learners. The Personalizing Instruction for All Learners Library includes 15 unique Learning Labs focused on personalization and an additional 28 Learning Labs on Foundational Practices and Technology Tools.

Project-based Learning

Schools interested in more cross-disciplinary learning experiences are turning to project-based opportunities that promote the development of critical thinking skills, problem-solving abilities, and communication skills. In project-based learning, students develop solutions to a clearly defined, authentic problems. This library includes 11 unique Learning Labs that facilitate the teachers' acquisition of project-based learning strategies, and an additional 28 Learning Labs on Foundational Practices and Technology Tools.

Student-Centered Learning bundle

These libraries are great resources for placing students at the heart of instructional practice. Why pick just one? For an incremental investment, implement all four libraries in your school, offering a wide range of options for personalized professional development addressing the unique needs of each teacher. This is your opportunity to model personalized instruction for your faculty!
