Maginot line

Why is it called the Maginot Line?

- Maginot Line, elaborate defensive barrier in northeast France constructed in the 1930s and named after its principal creator, André Maginot, who was France's minister of war in 1929–31. Main entrance to the Schoenenbourg Fort on the Maginot Line, Bas-Rhin department, Alsace region, France.

Planning and construction

The defences were first proposed by Marshal Joseph Joffre. He was opposed by modernists such as Paul Reynaud and Charles de Gaulle, who favored investment in armor and aircraft. Joffre had support from Marshal Henri Philippe Pétain, and there were a number of reports and commissions organised by the government.

- In January 1923, after Weimar Germany defaulted on reparations, the French Premier Raymond Poincaré responded by sending French troops to occupy Germany's Ruhr region. During the ensuing Ruhrkampf ("Ruhr struggle") between the Germans and the French that lasted until September 1923, Britain condemned the French occupation of the Ruhr, and a period of sustained Francophobia broke out in Britain, with Poincaré being vilified in Britain as a cruel bully punishing Germany with unreasonable reparations demands. The British—who openly championed the German position on reparations—applied intense economic pressure on France to change its policies towards Germany.

Although the name "Maginot Line" suggests a rather thin linear fortification, it was quite deep, varying (from the German border to the rear area) from 20–25 kilometres (12–16 miles). It was composed of an intricate system of strong points, fortifications and military facilities such as border guard posts, communications centres, infantry shelters, barricades, artillery, machine gun and anti-tank gun emplacements, supply depots, infrastructure facilities and observation posts. SPACE X VS. N.A.S.A

NASA

NASA

NASA stands for National Aeronautics and Space Administration. NASA is a U.S. government agency that is responsible for science and technology related to air and space.

NASA is an independent US government agency established in 1958 to research, develop spacecraft. NASA is an abbreviation to the National Aeronautics and Space Administration

NASA has begun work on human space travel programs such as Apollo, Mercury and NASA's Gemini have helped understand how to fly into space, resulting in the first human landing on the moon in 1969.

Satellites provided vast amounts of data on the Earth, which led to important information, useful to humans such as better understanding of weather. It is reported that NASA has helped develop and test a variety of advanced aircraft.

Fundamental disease research:
Alzheimer's Disease.

Discovery of steadily burning cool flames: When scientists burned fuel droplets in the flame

New water purification systems: Water is vital for human survival.

Drug development using protein crystals: Protein crystal growth experiments conducted aboard the space station have provided insights into numerous disease treatments

Exploring the fifth state of matter: 25 years ago, scientists first produced a fifth state of matter, called a Bose-Einstein condensate (BEC)

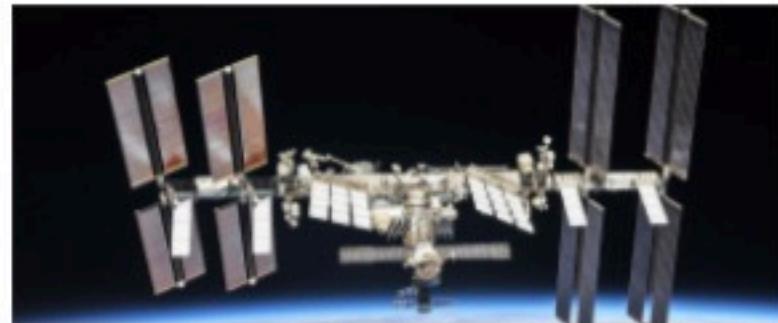

SPACE X

SPACEX

SpaceX is developing a satellite megaconstellation named Starlink to provide commercial internet service. In January 2020 the Starlink constellation became the largest satellite constellation ever launched. SpaceX is also developing Starship, a privately funded, fully reusable, super heavy-lift launch system for interplanetary spaceflight. Starship is intended to become the primary SpaceX orbital vehicle once operational, supplanting the existing Falcon 9, Falcon Heavy and Dragon fleet

DETAILS

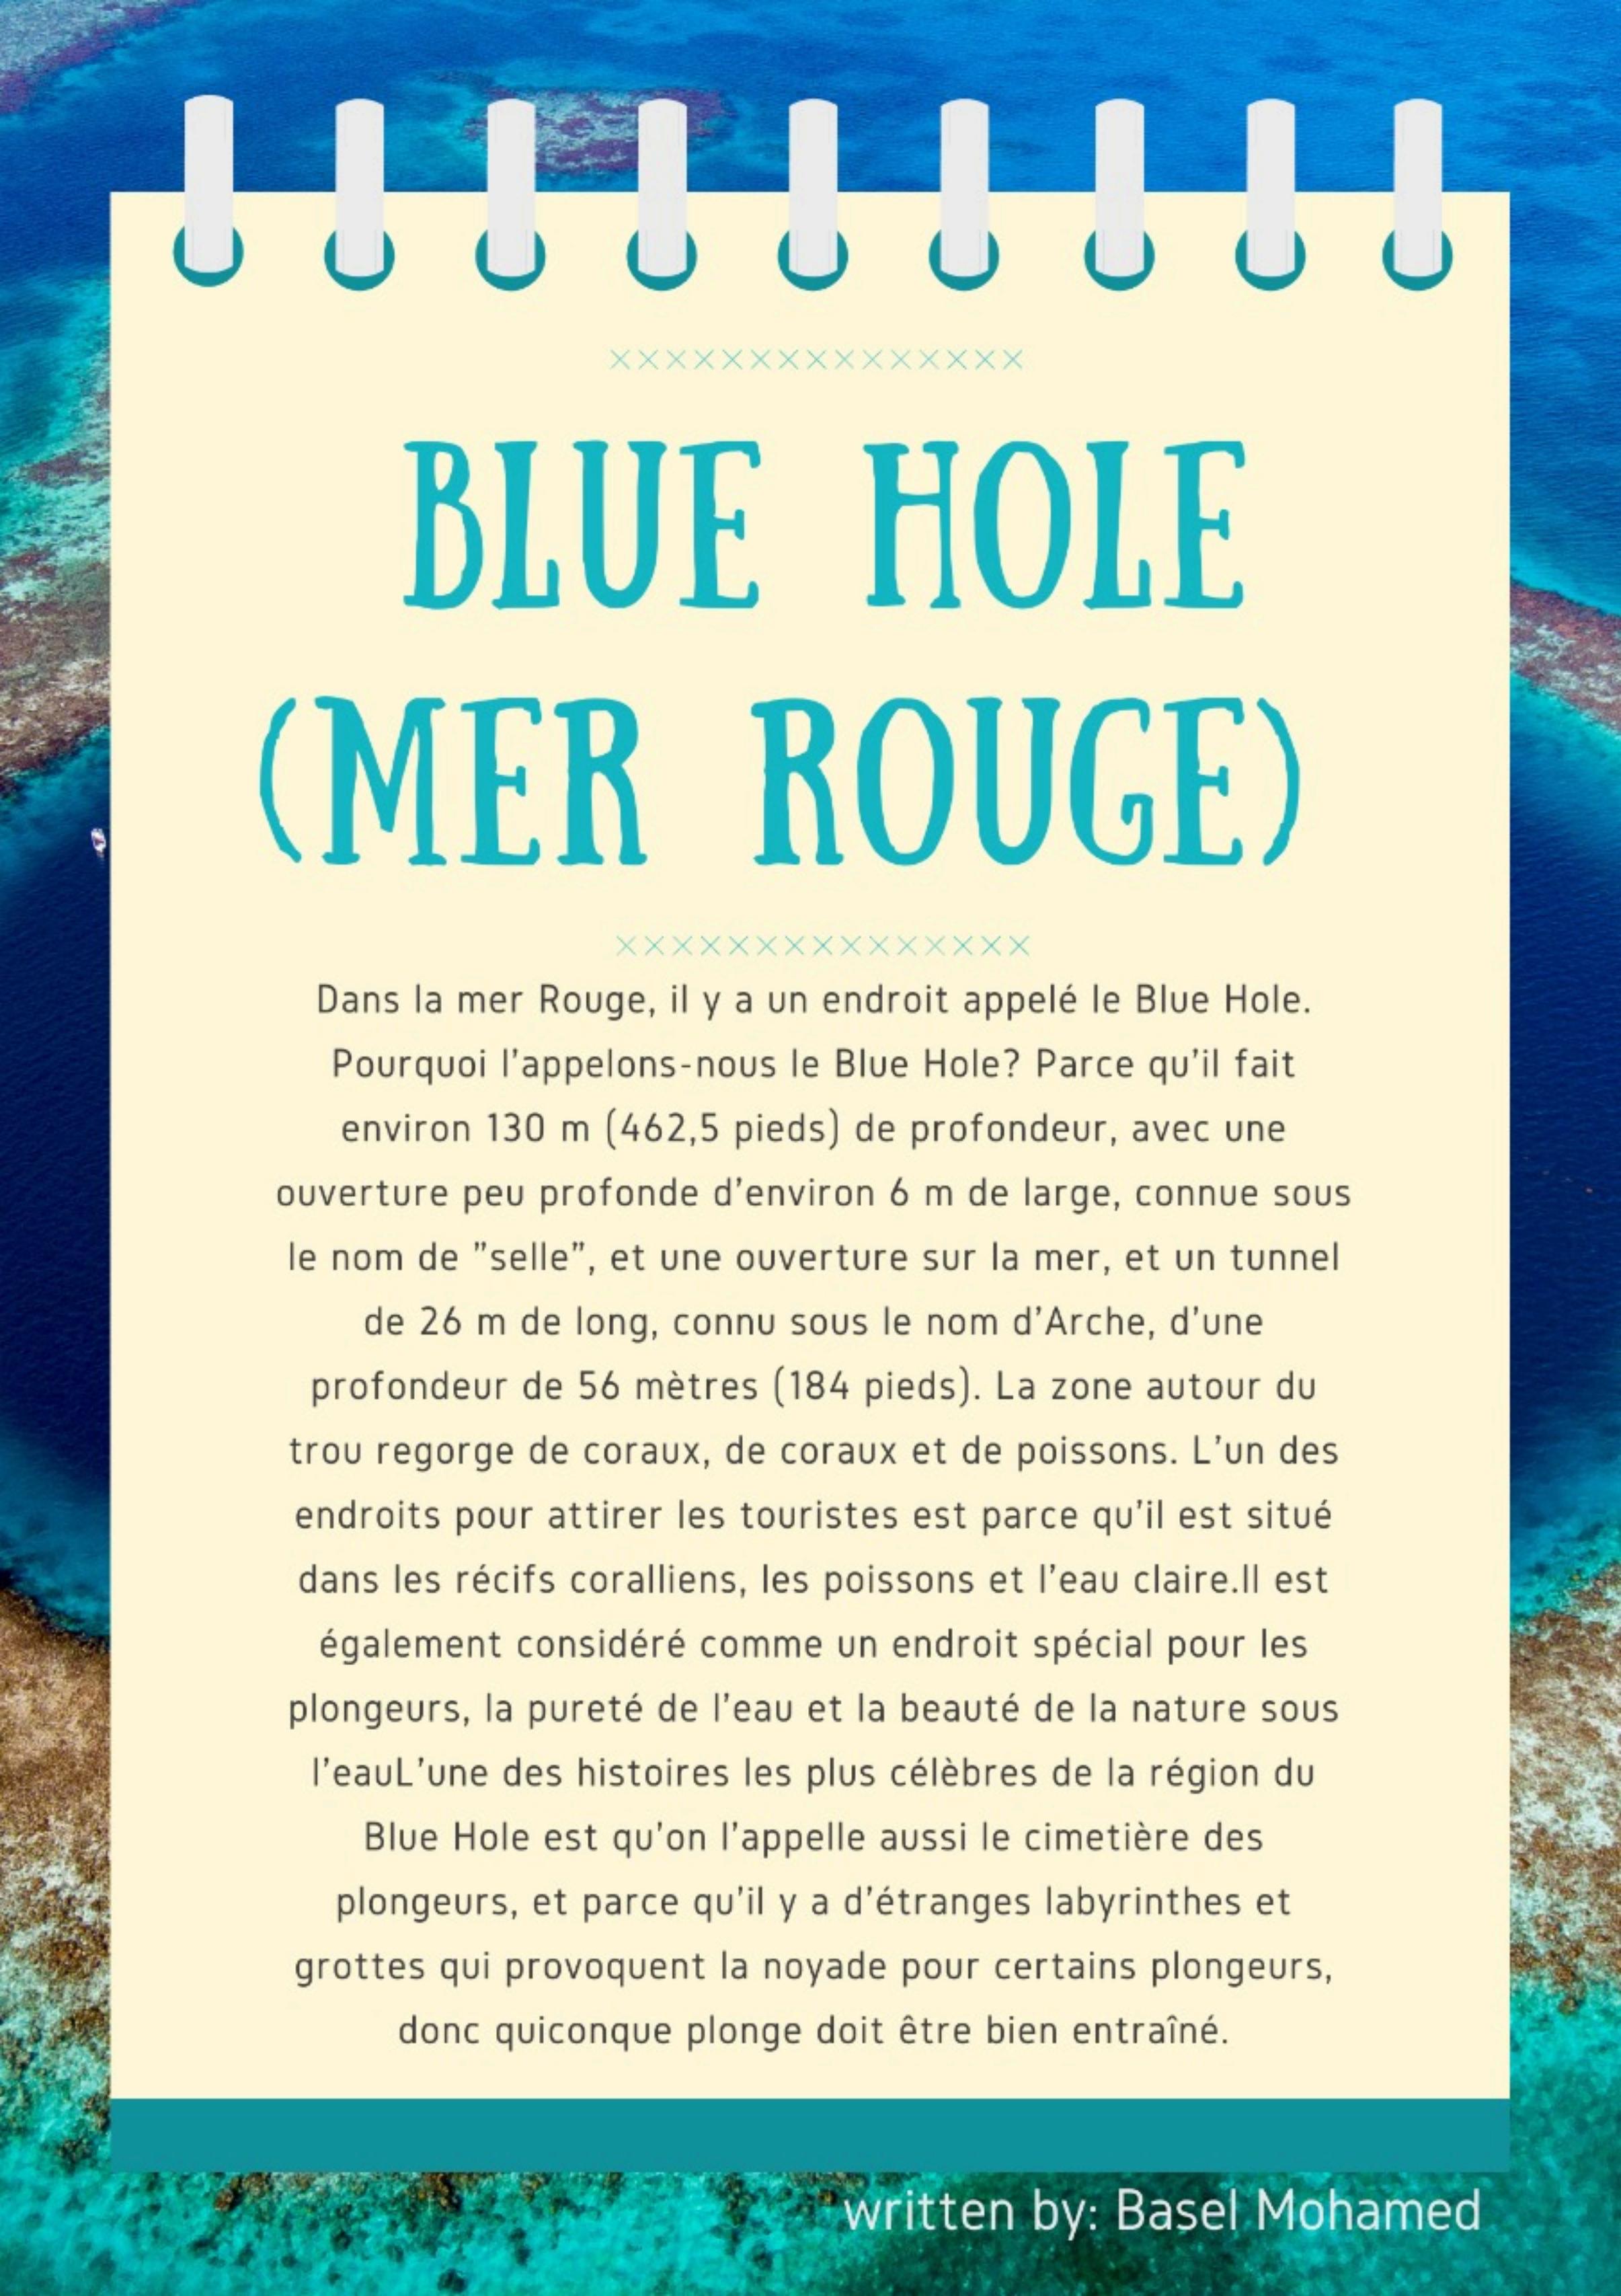

MEET THE SCIENCE SKEPTICS

Space X and NASA are space discovery companies. Both are trying to discover the space and discover if there is aliens or another planets that the humans can live in it. but what is the difference between the two companies?? NASA is non-profit company that is owned by United States and NASA is abbreviation of National Aeronautics and Space Administration. And NASA is older than space X it started in

For 20 years, the astronauts aboard the International Space Station have conducted science in a way that cannot be done anywhere else. Orbiting about 250 miles above our planet, the space station is the only laboratory available for long-duration microgravity research.

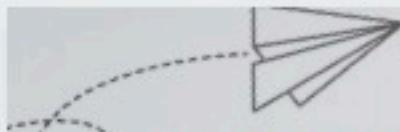

During the past two decades, the space station has supported numerous discoveries. This research not only helps us explore farther into space, it also benefits us back on Earth.

BLUE HOLE (MER ROUGE)

Dans la mer Rouge, il y a un endroit appelé le Blue Hole. Pourquoi l'appelons-nous le Blue Hole? Parce qu'il fait environ 130 m (462,5 pieds) de profondeur, avec une ouverture peu profonde d'environ 6 m de large, connue sous le nom de "selle", et une ouverture sur la mer, et un tunnel de 26 m de long, connu sous le nom d'Arche, d'une profondeur de 56 mètres (184 pieds). La zone autour du trou regorge de coraux, de coraux et de poissons. L'un des endroits pour attirer les touristes est parce qu'il est situé dans les récifs coralliens, les poissons et l'eau claire. Il est également considéré comme un endroit spécial pour les plongeurs, la pureté de l'eau et la beauté de la nature sous l'eau. L'une des histoires les plus célèbres de la région du Blue Hole est qu'on l'appelle aussi le cimetière des plongeurs, et parce qu'il y a d'étranges labyrinthes et grottes qui provoquent la noyade pour certains plongeurs, donc quiconque plonge doit être bien entraîné.

AIR CRASH INVESTIGATION

On March 27, 1977 two Boeing 747 passenger jets, operating KLM Flight 4805 and Pan Am Flight 1736, collided on the runway at

Los Rodeos Airport in (Tenerife North Airport) on the Spanish island of Tenerife

A terrorist incident at Gran Canaria Airport had caused many flights to be diverted to Los Rodeos, including the two aircraft involved in the accident. The airport quickly became congested with parked airplanes blocking the only taxiway and forcing departing aircraft to taxi on the runway instead. Patches of thick fog were drifting across the airfield; hence visibility was greatly reduced for pilots and the control tower.

Both flights had been routine until they approached the islands. At 13:15, a bomb planted by the separatist Canary Islands Independence Movement exploded in the terminal of Gran Canaria Airport, injuring eight people

There had been a phone call warning of the bomb, and another call received soon afterwards made claims of a second bomb at the airport. The civil aviation authorities had therefore closed the airport temporarily after the explosion, and all incoming flights bound for Gran Canaria had been diverted to Los Rodeos, including the two aircraft involved in the disaster.

The Pan Am crew indicated that they would prefer to circle in a holding pattern until landing clearance was given (they had enough fuel to safely stay in the air for two more hours), but they were ordered to divert to Tenerife.

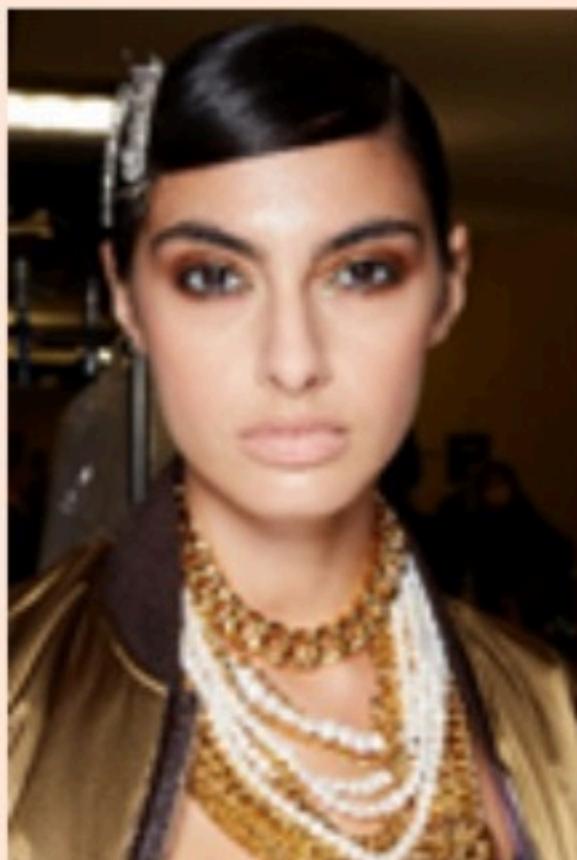

Los Rodeos was a regional airport that could not easily accommodate all of the traffic diverted from Gran Canaria, which included five large airliners

5 inspirations beauté repérées à la Fashion Week de Londres

Du 16 au 21 septembre, tous les regards étaient tournés vers Londres où se tenait la Fashion Week. L'occasion de revenir sur les looks beauté les plus marquants de cet évènement.

Après New York, c'est Londres qui a présenté ses collections le temps de la [Fashion Week](#). Connue pour son côté transgressif, l'évènement londonien a une fois de plus séduit par l'éclectisme de ses looks, en mode comme en beauté. Mélange de couleurs, de paillettes et même de stickers sur le visage, cette saison plus que jamais, le [maquillage](#) casse les codes. Lèvres noires, tresses XXL, sourcils avec strass ou décolorés, zoom sur les looks les plus marquants de cette semaine de la mode anglaise.

New York Fashion Week : les looks les plus marquants de cette semaine de la mode

D'habitude plutôt sage en termes de makeup, la Fashion Week de New York distille des touches de couleur pop ici et là, annonçant une saison beauté plutôt énergique. Entre aplats color block et pigments néon, voici les looks à retenir.

It's About you

Your thoughts indeed affect your actions. Your actions, in turn, translate into whether or not you succeed - in your career, relationships, and life. Your thoughts also play a part in your values and beliefs which influence the quality of your relationships and how you view the world at large.

WHAT IS POSITIVE THINKING?

Positive thinking is an emotional and mental attitude that focuses on the good and expects results that will benefit you. It's about anticipating happiness, health, and success instead of expecting the worst

1. EMPOWER YOURSELF:

Do you blame others when bad things happen to you? Or do you look to yourself for the solution? When you take responsibility for how you think, act and feel, you have an internal locus of control - and that is a key trait of successful people.

2 TAKE CONTROL OF YOUR STATE

Have you noticed that when you're having a bad day, Your body tells those around you that you are uneasy, angry, or sad and want to be left alone. Positive thinking is as much about your body as it is about your brain take control of your physiology Work on your posture. This technique requires you to observe yourself

HOW TO BENEFIT FROM POSITIVE THINKING?

Ultimately, building a fulfilling life is about mastering your emotions, both positive and negative. Positive thinking is one tool in your toolkit, but there are others you'll need. Here are four ways to fully embrace not only the power of positive thinking but also the incredible power of your mindset.

3. ADJUST YOUR MINDSET:

Adjusting your physiology is only one part of the puzzle; it's critical to catch the other negativity trigger in its opening stages as well. your mindset governs what thoughts flow through your head and how you feel and react to each one. If your mindset is poor, everything around you is going to seem all the worse.

4. STUDY YOUR HABITS AND FORM NEW ONES:

self-doubt is usually rooted in fear often the fear of failure. Doing something and failing seems like it would be unbearable, so your mind comes up with all sorts of reasons as to why you will not even make an effort. If you give in to these negative thoughts, you might not fail but you will stagnate, which is worse.

It is all about controlling negativity and replacing it with positive thinking. Positive thinking requires discipline and practice, but when used as it should, it can create positive results in your life. If we create a tremendous amount of positive energy, we create positive situations for us every day.

Bist du bereit für haustier ?

Es gibt viele Gründe dafür, sich ein Tier ins Haus zu holen. Tiere bringen Freude. Sie schenken Wärme und Zuneigung und führen oft auch zu neuen Kontakten mit anderen Menschen.

Doch nicht jedes Tier passt zu jedem. Wenn Du Dir selbst Enttäuschungen und dem Tier ein ungewisses Schicksal ersparen willst, müssen zunächst einige grundsätzliche Fragen geklärt werden:

- Hast Du genug Zeit Dich um ein Tier zu kümmern?
- Passt ein Tier auch mit Deinen Zukunftsplänen zusammen?
- Sind alle Familienmitglieder mit einem Tier einverstanden?

Hunde

Ein großer Hund passt besser in ein Haus mit Garten. Für die Haltung in einer Etagenwohnung sind eher kleinere Hunde geeignet

Katzen

Ideale Heime für Katzen sind Gehöfte oder Einfamilienhäuser in einer verkehrsberuhigten Lage, wo die Tiere selbst entscheiden können, wann sie im Haus bleiben oder einen Ausflug nach draußen unternehmen wollen.

Was ist Halloween?

WO DIE TRADITION IHREN URSPRUNG HAT UND WIE SIE WELTWEIT GEFEIERT WIRD

Zombies, Hexen, Vampire - diese und viele weitere Gestalten werdet ihr demnächst wieder auf der Straße oder auf diversen Events antreffen.

Am 31. Oktober ist es wieder so weit - dann werden wieder Kürbisse geschnitten, die gruseligsten und ausgefallensten Kostüme gekürt und schrille Partys gefeiert.

Welches Tier passt zu wem?

Sicher hast Du oder Deine Kinder ein Lieblingstier, das Du gerne in Dein Heim aufnehmen möchtest. Doch Du solltest Dich nicht allein von Deinen Wünschen leiten lassen. Vor der Anschaffung eines neuen Hausgenossen ist es wichtig, sich eingehend über dessen Bedürfnisse zu informieren.

Der Ursprung von Halloween

Der Begriff Halloween kommt aus dem Englischen und wird abgeleitet von „All Hallows Eve“, was übersetzt der Abend vor Allerheiligen bedeutet. Halloween ist ein Fest mit einer langen und spannenden Tradition. Schon die Kelten läuteten den Winter mit einem Fest ein, das sich Samhain (Ende des Sommers) nennt und eine der vier großen keltischen Jahreszeiten begrüßt.

Halloween in Deutschland:

Die gruselige Tradition wird auch hierzulande immer am 31. Oktober gefeiert. Allerdings bleibt es meist auch nur bei dem einen Tag, anders als in Amerika, wo eine ganze Woche Halloween gefeiert wird.

Saving Private Ryan.

Starring Tom Hanks and Matt Damon, Saving Private Ryan , is considered one of the greatest movies ever produced about World War 2. It tells the story of a group of special forces which is assigned to fetch a soldier named Ryan as his three brothers are killed in action. As a sign of mercy, the US army wants to save the fourth and last son of the bereft mother.

The unit gets going and meets with challenges of horrible nature. Not only does the unit save the private, but also commits acts of heroism which pave the way for coming forces.

Those who do so live among us even when it is not time of war. Our school has recently witnessed much work which is carried out by our IT department. This work aims mainly at making the educational process much more effective and paves the way for everyone to be able to work easily.

COME AND LAUGH

WOW!

Laughing Matters

When God sends help, don't ask questions

from a reader

She hurried to the pharmacy to pick up the medication. When she got back to the car, she found her keys locked inside.

The woman found an old rusty coat hanger on the ground. She looked at it and said, "I don't know how to use this."

She bowed her head and asked God to send her some help.

Within five minutes an old motorcycle pulled up, driven by a bearded man who was wearing an old biker skull rag. He got off his cycle and asked if he could help.

She said, "Yes, my husband is sick.

I've locked my keys in my car. I must get home. Please, can you use this hanger to unlock my car?"

He said, "Sure." He walked over to the car, and in less than a minute the car was open.

She hugged the man and through tears said, "Thank you, God, for sending me such a very nice man."

The man heard her little pray and replied, "Lady, I am not a nice man. I just got out of prison yesterday; I was in prison for car theft."

The woman hugged the man again sobbing, "Oh, thank you, God! You even sent me a professional!"

Amazing Fact

You need at least 1 witness to prove a murder

and a minimum of 2 witnesses to register a marriage!

It clarifies which is more dangerous

Wife: "The car is not starting. Dashboard shows the sign of a person sitting on toilet."
Husband: "What...?? Send me a picture."

school is not a place to sleep

Xavier
then home is not a place to study.
Thank You.

Our language is called the Mother tongue because the Father never gets a chance to speak...

A woman is driving 1st time on the Highway...

Her **Husband** calls and says:
"Be careful love, it's just been on the radio that someone is driving wrong way on the highway..."

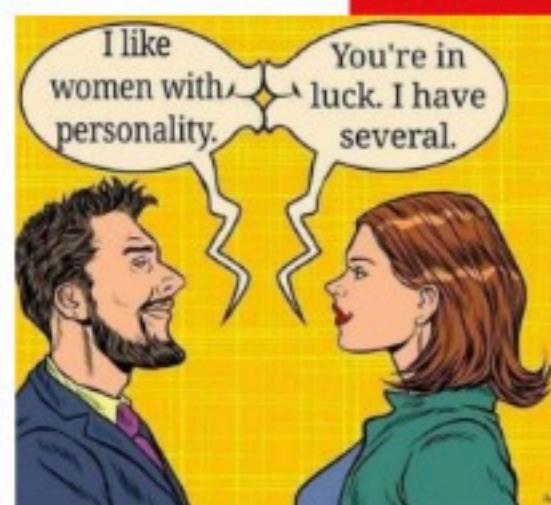

She replies: "Someone...?
These idiots are in hundreds."

An elderly man thinking his wife was losing her hearing went about 20' behind her and asked "Can you hear me sweetheart?" No reply. Moved to 10' and inquired again. No reply. 5' and not a word. A few inches behind ear, he asked "Can you hear me now honey?" His wife said "For the fourth time, yes."

Never use a GPS when going to a cemetery. Not nice to hear "You've reached your destination."

When relatives visit your home and your mom offers them cookies that you have never seen before

I saw a guy on his motorcycle and the back of his shirt said "If you can read this the wife fell off."

WE WILL MISS YOU!
